SUMMARY

Experienced Software Engineer with over 10 years of full-stack development and technical leadership experience. Proven ability to architect scalable solutions, mentor teams, and drive strategic initiatives. Expert in cross-functional collaboration, framework agnostic system design, and optimizing engineering processes.

SKILLS

Java • Javascript • Ruby • Python • React • Spring Boot • GraphQL/REST
SQL • Redis • Web Development • System Design • SOA/Microservices • UI/UX

EMPLOYMENT

Senior Software Engineer - *Flexport*, *San Francisco, CA*   *2022 -2025*
- Served as subject matter expert and tech lead for Schedules team
- Architected robust solutions and frameworks for longevity and maintainability
- Worked cross-team to develop solutions involving multiple stakeholders
- Closely involved in team planning to set strategic, and realistic, goals
- Provided teach leadership for team and created/enforced best practices
- Mentored engineers across org, empowering growth and quick ramping
- Lead code contributor on team and consistently top performing org wide
- Continually addressed tech-debt and drove forward long-tail tech migrations
- Proactively built tooling to improve ease of development and engineering velocity

Software Engineer II - *Flexport*, *San Francisco, CA*   *2019 - 2022*
- Full stack engineer on Squad Tools and Schedules teams
- Built and maintained SOA backend with Spring Boot and Ruby on Rails frameworks
- Created frontend features in Flexport App using React and GraphQL
- Designed engineering solutions and drove through engineering review to user delivery
- Worked closely with product team to address user needs with features and UAT

Senior Frontend Engineer - *Extole*, *San Francisco, CA*   *2017 -2019*
- Planned sprints for myself and junior team members in Moldova and San Francisco offices
- Owned and developed js/css/html assets to seamlessly match client user flows and site styles
- Designed core frontend behavior; negotiated implementation with product and engineering
- Expanded/optimized core.js custom Extole framework rendered as 3rd party on client sites

Technical Services Engineer - *Extole*, *San Francisco, CA*   *2015 - 2017*
- Worked in 15+ person team, 2 week sprints, pushing code to staging and production weekly
- Built Extole frontend core products, custom client solutions, and in-house js tool apps
- Created solutions using RESTful APIs including: Facebook, Twitter, LinkedIn, GMail, etc.
- Collaborated between departments to produce efficient and effective user interactions
